John Hillenbrand is working on talking points right now – will focus on Leviathan and Iron Mountain Mine.

We are meeting with Bill Keener on 2<sup>nd</sup> floor at 10:00 am. Planning for John H to speak.

If you have any different thoughts or concerns, meet us at 10:00 or come to John H's desk.

See article that ran yesterday. Looks like they covered the macro issue of many mines. I think the CBS reporter is going to want to hear about Iron King and Leviathan more specifically, since they are the two that are most similar to Gold King. John L – can you provide someone to brief Jared on those sites?

## Thousands of mines with toxic water lie under West

---

DENVER – Beneath the western United States lie thousands of old mining tunnels filled with the same toxic stew that spilled into a Colorado river last week, turning it into a nauseating yellow concoction and...
